

# WELDPRO LTD.

SPECIALIZING IN ALUMINUM FABRICATION & REPAIR

Choosing **WeldPro & JMK Laser** for your laser processing requirements partners you with a proven leader in the utilization of today's newest laser technology. **WeldPro & JMK Laser's** modern **LASER CENTER** offers an extensive range of innovative laser cutting....

## Cutting

Our high-power 3500 watt laser produces even complex part configurations quickly and efficiently. We process **CARBON STEEL** to 3/4 inch thick, **STAINLESS STEEL** to 1/2 inch thick and **ALUMINUM** up to 3/8 inch thick. Material sizes up to 120 x 60. Even tubular materials up to 12" in diameter can be accommodated.

## Laser Precision...

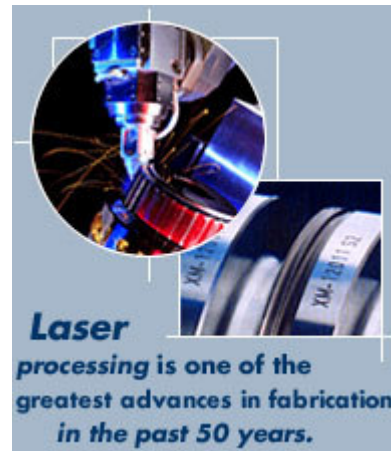

Accurate, Clean, Fast

---

Laser cutting provides a perfect cut every time, even on hard stainless steel. Complex contours, small holes and narrow webs come off our laser clean and burr-free.

---

If your requirements call for consistency and accuracy throughout a job, you can count on our computer controlled laser to deliver. All we need is your CAD file, blueprints, drawings or sample pieces.
